

SPEED – SMOKE – STRESS: *Is killing American Firefighters*

This 2 hour presentation discusses Firefighter Fatalities and their causes. Most Firefighters seem to accept the status quo and deny that the fire service is hurting itself. Too many times a line of duty death is blamed on improper tactics or unsafe responses rather than true cause, INACTION. This presentation can be delivered to all levels and is currently being taught as a pilot course. Let's honor what they gave by learning from their sacrifice.

WHAT THE AUDIENCE HAS SAID:

"As a more rural county we quite often neglect the most obvious things that will make us better firefighters. Your enthusiastic approach and demeanor opened more than just a few eyes and thoughts". - President County Firefighters Association.

Where:

Lake Michigan College – Bertrand Crossing
1905 Foundation Drive Niles MI 49120

Special Guest:

Paul Enhelder Chicago FD (Ret) & Cari Thornton LODD Survivor

March 3 2012 9am – 12:30 pm
